

The Virden Area Foundation is proud to present:

Goulter School Advisory Council Basketball Court

The Goulter School Advisory Council has been working with the parents, staff and the school division of Goulter School to provide a learning environment that stimulates learning in many forms. Recently it was determined that the basketball court was in need of dire repair. The asphalt had deteriorated away in many places causing safety concerns.

In the spring of 2016 Goulter School Advisory Council decided to replace the play surface with an environment safe play surface made of recycled tires. The Virden Area Foundation provided the Advisory Council with a grant of \$5000.00 to assist in this community project.

The Virden Area Foundation is a charitable organization that brings together community-minded people to build a permanent endowment fund from which it supports community projects in the Virden area through the making of grants.
